

MISSION STATEMENT

- Striving to be the leading Green Energy affordable building material provider focused on homes, apartments and commercial buildings while caring for the environment.

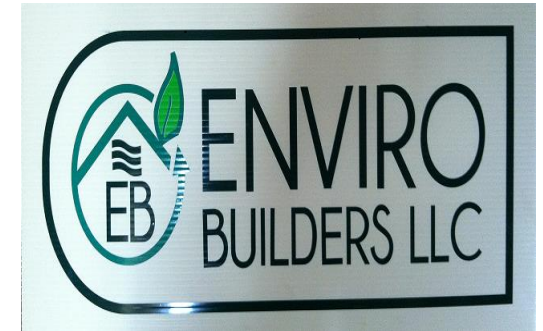

SmartSteel Building Materials

- Highly Insulated: R-49.
- Will not absorb water.
- Will not burn (ASTM E84)
- Withstands wind load of 300 mph (ANSI A58).
- Replaces conventional building methods which use studs, insulation & sheathing board to build walls and roofs.
- Lower construction labor cost.
- Resists Termite & Mold.
- No formaldehyde or cellulose material.
- Panels made with recyclable non-toxic material.

Achieves Zero Net Energy when combined with a Solar System.
